

MY OWN GARDEN (CLASS II)

‘ The true method of gaining knowledge is through experiment’

In order to demonstrate how plants develop from seeds, on 17th Dec, 2018, an activity ‘My Own Garden’ was conducted for the students of class II. Students brought few kidney beans, cotton and a plastic bowl for the activity. Then, they sowed their seeds in the cotton in the bowls. After few days, they felt happy to see the seeds sprouting and then growing into small plants.
