

TICK TOCK ACTIVITY – CLASS II

“For the things we have to learn before we can do them, we learn by doing them.”

On 12th Dec, 2018, a ‘Tick Tock Activity’ was conducted for students of Class II. The students brought a paper plate and few paper strips. They were instructed in class regarding writing the numbers on the strips and pasting of strips on the edges of the paper plate, so as to give it a look of an actual clock. Then, they were instructed to draw the long and the short hand on the face of their clock for the given time.

The activity lead to reinforce the concept of time and the students enjoyed making their own tick tock clock.
