

# EARTH DAY

To generate interest and foster environmental stewardship in the behaviour, students of Class II celebrated 'Earth Day' on 21st April, 2018. To create the awareness and appreciation about the earth's environment, they were told about various measures to protect our planet. They made beautiful handbags using the newspaper and chart paper . These handbags were decorated in a very creative way by pasting a paper plate painted with blue and green colour as earth and two hand cutouts along with it .Thus, the whole activity aimed at showcasing that by joining hands together, we can save our mother earth .
