

# EARTH DAY ACTIVITY

(20.04.18)

*Let's go green!*

In order to inculcate love for Mother Earth right from the Early Years, Plantation Activity was organised in the School's Playground for the children of L.K.G. Our curious young learners loved to plant seeds into the soil with their little hands.

It is imperative that in these formative years, we guide our children to understand the significance of our role as an individual to ensure that we take care of our planet. The significance of cleanliness was discussed with the children. Moreover, children ensured that that they cleaned up their classrooms as a part of taking ownership to keep their surroundings clean. The children were sensitized towards cleanliness as it is an essential life skill for them to understand that they are responsible for their own surroundings.
