

THE GREEN GROCER

Our little angels finally learnt about healthy eating habits when they practically set up a Vegetable Shop on 18.05.18 and enacted as green grocers by selling and learning about a variety of fruits and vegetables from their vegetable cart. The li'll vendors were extremely excited and called out the names of different fruits and vegetables thereby, justifying the school's philosophy "learning through fun" for Pre school children. The activity proved extremely beneficial as they all were engaged in buying and selling vegetables through exchange of dummy currency notes and weighing machines thereby, enhancing their pre number concepts.
