

TRAFFIC PARK (L.K.G.)

Teach them young and they will learn for a lifetime. This is true even for traffic rules. Young minds learn by involvement, therefore they were exposed to simulation traffic park in order to learn the importance and significance of different traffic lights, various traffic signals, zebra crossings, seat belts, helmets etc. A proper traffic park with lights and zebra crossing was created by teachers to give them a feel of Traffic Park. Children were given toy cars and bikes to ride on the road keeping an eye on the traffic signals. They were repeatedly taught the significance of “Red, Yellow and Green lights”. It was a pleasure to watch kids enjoying their ride following the rules.
