

WORK EDUCATION

It has been rightly said that, “Life is too short not to celebrate the nice moments”. The October month is full of such nice joyous moments as it marks the beginning of the festive season. To make these moments even more special and memorable the children took part in many creative activities this month. They used colourful paper and other decorative materials to make paper lanterns (Kandils) and streamers (Torans). As these were mass activities, the whole class took part in them in enthusiasm. They made a variety of paper lanterns and streamers which showcased their imagination and creative effort. Another fun activity done this month was 'Diya Decoration'. The children brought old CDs, glitter sheets, mirrors etc from home and made bright and colourful diya holders to be used during the festive season. They also decorated the diyas/earthen lamps with paint, laces, mirrors etc. These group activities filled the children with abundant happiness and the festive spirit.
