

WORKSHOP ON HANDWASH (UKG)

Washing hands and maintaining good hygiene is taught to the children right from the beginning. A workshop to re-emphasize the same was being conducted on 10.12.2018 in the school premises, thereby giving children an exposure to variety of other facts related to washing our hands. They were taught about the number of times the hands to be rubbed off to remove germs. Few guests were outsourced to visit and explain the children about the relevance of washing hands.
