

## **SEED GERMINATION ACTIVITY (UKG)**

‘Seed Germination Activity’ was taken up by UKG on 7th of December, to educate the children on the way the plants grow up from seedling to sapling , thus turning out to be a completely new plant. Children had hands on experience as they learnt to water the plants, providing enough sunlight to the plants etc. They could relate to the fact that plants are a living thing as they are, which is very important for them to understand and imbibe.
